## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 13 recites the limitation "the first XOR gate" in lines 10-11 and 12. There is insufficient antecedent basis for this limitation in the claim. It appears to the examiner that claim 14 should be incorporated into claim 13 to provide proper antecedent basis for "the first XOR gate" and then canceled to obviate any redundancy objections. Correction or clarification is required.

Claims 14-15 are also rejected due to the limitations of the base claim and any intervening claims.

### ***Allowable Subject Matter***

4. Claims 1-12, 16 and 18 are allowed.
5. Claim 13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. Claims 14-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is an examiner's statement of reasons for allowance: Claims 1-12 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 3 wherein the clock multiplier comprises the combination of a first clock multiplication circuit (31), an inverter (34), and an amplifier (35) for feedback-controlling the delay time of the first clock multiplication circuit (31) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 16 and 18 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 6 wherein the first clock multiplication circuit (61) comprises a second voltage-controlled delay line (613) and an XNOR gate (614) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
